

## 0.8A Adjustable/Fixed Low Dropout Linear Regulator

### General Description

The AMS1117-ADJ and AMS1117-1.2,-1.5,-1.8,-1.9,-2.5 -3.3 and-5.0 are low dropout three-terminal regulators with 0.8A output current capability. These devices have been optimized for low voltage where transient response and minimum input voltage are critical.

On-chip thermal limiting provides protection against any combination of overload and ambient temperatures that would create excessive junction temperatures.

The AMS1117 series regulators are available in the industry-standard SOT-89 packages.

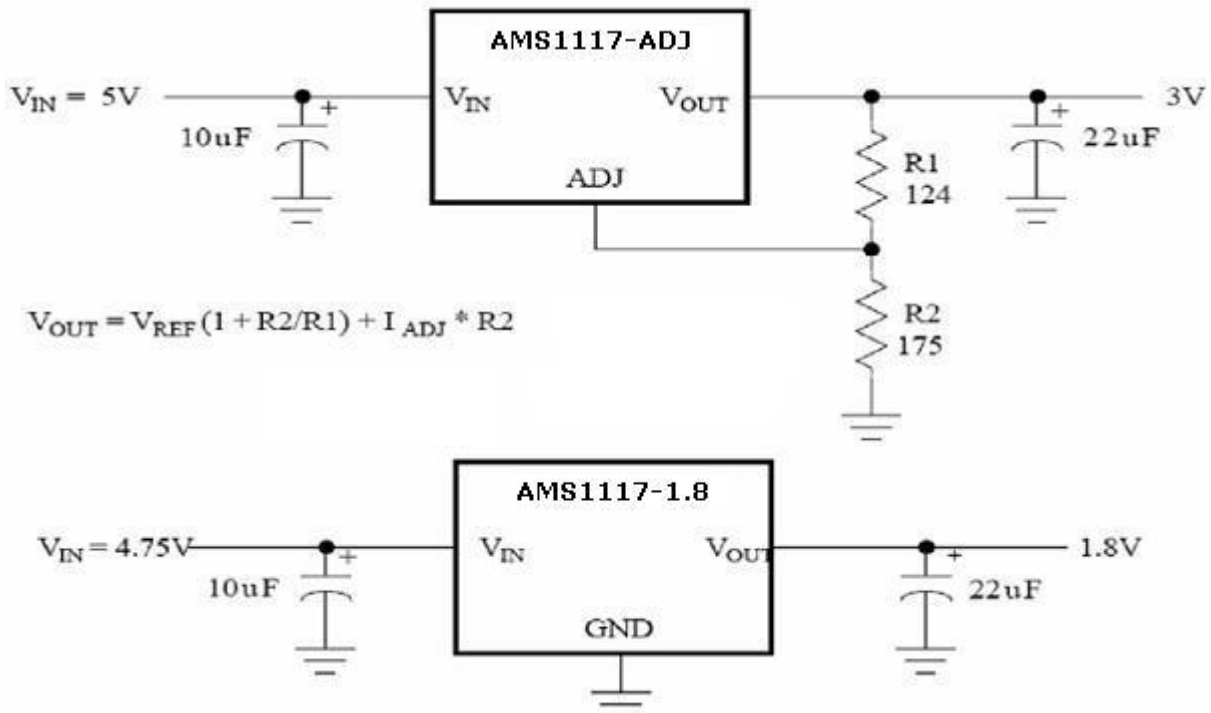

### Key Features

- Low dropout voltage
